Summary

Java Backend Developer with hands-on experience building and debugging backend systems in **Java (8/17/21)** and **Spring Boot**. Merged code into production codebases including **Apache Hop**, **Apache Shiro**, and **Kestra**. Strong foundation in REST APIs, PostgreSQL, Docker, and microservice architecture, backed by 4+ years of professional experience in E-Commerce operations and ERP data pipelines.

Technical Skills

Languages & Frameworks: Java (8/17/21), Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate

Architecture & Cloud: Microservices, Spring Cloud (Eureka, Gateway, OpenFeign), REST APIs, JWT, OAuth2

Databases & Caching: PostgreSQL, MySQL, Query Optimization, Database Indexing, Redis (Basics)

DevOps & Tooling: Docker, Git, GitHub, Maven, AWS (EC2), Linux (Bash), JUnit 5, Postman

Software Engineering & Open Source

Apache Software Foundation | *Open Source Contributor (Java)*

2024 – Present

Apache Hop & Apache Shiro Repositories

[PR #8344](#) | [PR #8343](#) | [PR #2854](#)

- **Apache Shiro:** Fixed an Active Directory user principal name binding defect in the LDAP realm; patch was validated and **merged into release 3.0.1**.
- **Apache Hop Web:** Resolved a thread-stalled session bug by maintaining an active `ServerPushSession`, preventing web interface log freezes.
- **Apache Hop Core:** Cleaned up startup routines in `HopEnvironment` by silencing noisy HTTP wire logs during notification polling; wrote unit tests to prevent regressions.

Jenkins & Kestra | *Open Source Contributor (Java)*

2024 – Present

Workflow SCM Plugin, Jira Plugin, Kestra Core Engine

[PR #143](#) | [PR #19007](#)

- **Jenkins Jira Plugin:** Fixed broken multibranch build and deployment links sent to Jira Cloud by updating `RunUrlProvider` with URL encoding; added tests using `JenkinsRule`.
- **Jenkins SCM Step:** Optimized workspace polling logic to skip baseline computation when polling is disabled, cutting unnecessary file system traversals.
- **Kestra Engine:** Resolved socket connection leaks during MCP health checks across builder instances; added automated regression test coverage.

Projects

Synoptiq | *Workflow Automation & Email Sync Platform*

[\[Code\]](#) | [\[Live Demo\]](#)

Java, Spring Boot, Spring Security, PostgreSQL, OAuth2, JWT, Docker, AWS EC2, HTTP/2, Gmail API

- Built a backend platform integrating OAuth2 and Gmail API to capture and sync inbox records into PostgreSQL.
- Implemented **HTTP/2 multiplexing** to support concurrent API calls and real-time Server-Sent Events (SSE) over a single persistent TCP connection.
- Secured endpoints using stateless **JWT filter chains** and cookie-based session management.

Routesphere | *Logistics Microservices Suite*

[\[Code\]](#)

Spring Boot, Spring Cloud (Eureka, API Gateway, OpenFeign), Docker, JWT, PostgreSQL, Spring Security

- Built a logistics management system structured into **9 independent Spring Boot microservices** handling dispatch, orders, and tracking.
- Configured service discovery via **Spring Cloud Netflix Eureka** and routed client requests through **Spring Cloud Gateway** with centralized JWT validation.
- Implemented synchronous inter-service communication using **OpenFeign** clients with client-side load balancing.

Workboard | *Task & Workflow Management API*

[\[Code\]](#)

Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, Spring Security

- Built a modular REST API managing project tasks, team assignments, and role-based access control.
- Designed relational data schemas in MySQL and implemented dynamic filtering and pagination using **Spring Data JPA Specifications**.

Professional Background

E-Commerce Operations

2021 – May 2026

Wipro Consumer Care, Medicon Leather, Mannol India, iThink Logistics

Bengaluru, India

- Managed multi-channel catalog feeds, inventory synchronization, and SAP ERP order reconciliation across 7+ marketplaces (Amazon, Flipkart, Myntra), maintaining 99%+ data accuracy.
- Monitored order fulfillment lifecycles and marketplace API integrations, developing a concrete understanding of production data consistency and logistics workflows.

Education

Bachelor of Computer Applications (BCA)

Ongoing

University of Mysore

Mysuru, Karnataka

Higher Secondary Certificate (12th)

2018

Rural Institute of Advanced Studies

Raipur, CG
