SUMMARY

Java Backend Developer working with **Java (8/17/21)**, **Spring Boot**, **Spring Security**, and **Microservices**. Contributed to production open-source engines (**Spring Cloud**, **Apache Camel**, **Apache Shiro**, **Kestra**), resolving core defects in cloud authentication, Kafka event transport, and concurrency. Background includes 4+ years managing supply chain, SAP ERP, and e-commerce marketplace operations.

TECHNICAL SKILLS

Languages & Frameworks: Java (8/17/21), Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate

Architecture & System Design: System Design (HLD & LLD), Microservices, Load Balancing, RESTful APIs, Spring Cloud, JWT, OAuth2

Databases & Caching: PostgreSQL, MySQL, Redis (Caching Strategies), Database Indexing, Query Optimization

DevOps & Tooling: Docker, Git, GitHub, Maven, AWS (EC2), Linux (Bash), Swagger/OpenAPI, Postman, JUnit 5

OPEN SOURCE CONTRIBUTIONS

Spring Cloud | *Distributed Configuration & Microservices Engine (Merged)*

[PR #3272 \(Merged\)](#)

- **Azure DevOps Workload Identity Authentication:** Implemented passwordless Azure Managed Identity authentication for Git repos in Spring Cloud Config (+706 lines); acquired Azure tokens and injected Bearer headers into JGit HTTP transport with fallback.

Apache Camel | *ASF Enterprise Integration & Event-Driven Framework (Merged)*

[PR #3039 \(Merged\)](#)

- **Kafka Transport Hop Key Preservation:** Resolved Kafka record key loss across HTTP hops by configuring kafka-sink Kamelet to map standard kafka-key and CloudEvents ce-kafkakey headers to CamelKafkaKey.

Apache Shiro | *ASF Security & Authentication Framework (Merged)*

[PR #2854 \(Merged\)](#)

- **Fixed Active Directory DN Authentication:** Resolved Active Directory user principal name binding bug; validated and **merged** into official Apache Shiro release 3.0.1.

Apache Hop | *Data Orchestration Platform (ASF Top-Level -- 2 Merged)*

[PR #8344 \(Merged\)](#) | [PR #8343 \(Merged\)](#)

- **Hop Web Session Refresh & Wire Logging:** Resolved UI thread refresh freezes by maintaining active ServerPushSession state; silenced high-frequency HTTP wire logging during background polling.

Kestra | *Declarative Orchestration Engine (15k+ Stars -- 2 Merged)*

[PR #19007 \(Merged\)](#) | [PR #51 \(Merged\)](#)

- **Core Engine & Plugins (Merged):** Resolved MCP client auto health-check socket leaks across builder instances (Issue #18981); added case-sensitive enum validation for Telegram plugin payloads.

PROJECTS

Synoptiq | *Java, Spring Boot, Spring Security, PostgreSQL, Docker, AWS EC2, HTTP/2*

[\[Code\]](#) | [\[Demo\]](#)

- Built a workflow automation platform integrating OAuth2 Google Sync and Gmail API to capture and sync inbox records into PostgreSQL.
- Enabled **HTTP/2 multiplexing** to support concurrent API calls and real-time Server-Sent Events (SSE) over a single persistent TCP connection.
- Handled authentication and access control via stateless **JWT filter chains** and cookie-based session tokens.

Routesphere | *Spring Boot, Spring Cloud (Eureka, API Gateway, OpenFeign), Docker, JWT*

[\[Repository\]](#)

- Decomposed logistics dispatch, order fulfillment, and tracking into **9 independent Spring Boot microservices**.
- Set up **Spring Cloud Netflix Eureka** for dynamic service discovery and routed traffic through **Spring Cloud Gateway** with centralized JWT validation.
- Implemented synchronous inter-service communication using **OpenFeign clients** with client-side load balancing.

Workboard | *Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, Spring Security*

[\[Repository\]](#)

- Developed a modular REST backend managing project workflows, task delegation, and role-based permissions across teams.
- Designed relational data models using **Spring Data JPA/Hibernate** with custom dynamic filtering and pagination via JPA Specifications.

EXPERIENCE

E-Commerce & Supply Chain Operations

2021 – 2026

Wipro Consumer Care, Medicon Leather, Mannol India, iThink Logistics

Bengaluru, India

- **Data & ERP Systems:** Managed SKU catalogs, multi-channel order pipelines, and SAP ERP inventory reconciliation across 7+ online marketplaces (Amazon, Flipkart, Myntra), maintaining 99%+ data accuracy.
- **Operations & Logistics:** Coordinated regional fulfillment workflows and warehouse routing pipelines; leveraged this direct operational experience with logistics bottlenecks and inventory flows to transition into designing resilient enterprise backend architectures.

EDUCATION

University of Mysore

Expected 2028

Bachelor of Computer Applications (BCA) - Online (100% available for full-time work)

Mysuru, Karnataka

Rural Institute of Advanced Studies

2018

Higher Secondary Certificate (12th)

Raipur, CG
